  IBM
- Python Programming 🗗
  NPTEL

PROJECTS

CashOrbit App

Multi-functional reward-based mobile app featuring secure user login, real-time leaderboard, referral system, task management, mini games and withdrawal functionality. Designed for users to earn rewards through completing tasks and referrals while tracking progress via leaderboard. Built with Flutter and Firebase, integrated with AdMob monetization, optimized for performance, and designed with modern UI/UX for smooth and engaging user experience.

Radhe Radhe App

A spiritual companion designed to assist users in their daily mantra sadhana. Features include a digital mala (jaap counter), customizable chant tracker, and an intuitive interface for seamless spiritual practice. Ideal for devotees seeking a focused and personalized meditation experience.

MohX AI Website UI

Interactive and visually stunning personal portfolio website featuring 3D animations, smooth transitions, and modern UI/UX design. Designed to showcase apps, games, and creative projects in a highly engaging way. Built with HTML, CSS, JavaScript, and Three.js, optimized for responsiveness, performance, and immersive user experience.
